

Innovative Technology for Addiction Treatment Organizations

Connecting Patients, Alumni, Families, Clinicians, and Communities

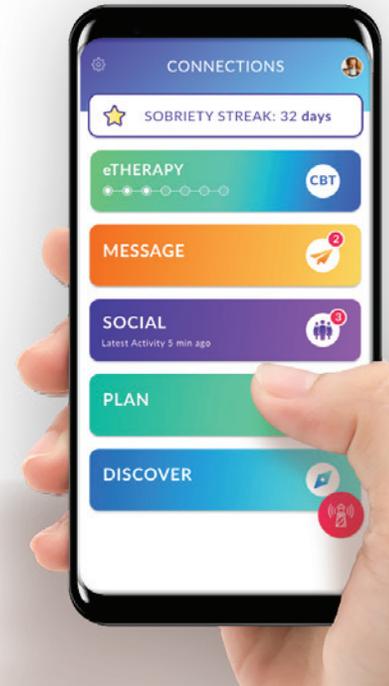

The unique combination of **eIntervention** and **eRecovery** supports substance use disorder (SUD) providers in attracting more patients, measuring outcomes, and differentiating services in a crowded market. With CHESS Health providers improve communication throughout the care continuum, remove barriers to getting more patients into treatment faster, and improve treatment adherence and recovery success.

eIntervention

eIntervention is a combination of a web-based referral management system and smartphone app to enable digital referral connections and motivate and support individuals and family members to follow-through on referrals made to your organization.

eRecovery

eRecovery includes the Connections App, an evidence-based smartphone app for patients in treatment and recovery from addiction, along with mobile and web-based functionality for the care team.

CONNECTIONS APP

- Appointment reminders
- Sobriety tracking
- Online discussion groups
- Journaling
- Treatment plan tracking
- Daily / Weekly surveys
- High-risk location alerts

Addresses Key Provider Priorities

Together, eIntervention and eRecovery target the unique needs of SUD patients, from referral to treatment to education and ongoing engagement. This powerful combination helps providers

- Digitize community relationships to build volume
- Give patients motivational tools to improve treatment adherence
- Improve family participation and ongoing alumni engagement
- Streamline tracking and analysis for better outcome reporting

How It Works

Build Volume and Competitive Advantage

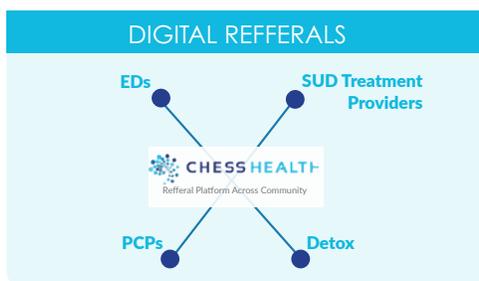

- CRM for more effective business development
- Lowers cost of acquisition
- Improves patient mix
- Increases referral sources

Transform Intake and Outreach

- Digitize community & referral relationships
- Convert more referrals to new patients
- Track & analyze referral effectiveness
- Enhance outcome reporting

Improve and Measure Treatment Outcomes

- Improve retention with interactive education (CBT) and motivation videos
- Build trust through 1:1 messaging for patients, peers, clinicians
- Increase alumni engagement with ongoing communication

The App makes them feel safe, there's always someone to reach out to at any time of the day or night. It's making a difference in our program.
