Telehealth Services to Support Addiction Recovery During the Pandemic

COVID-19 and Addiction

The COVID-19 pandemic created significant challenges for those struggling with addiction. Justice-involved patients with opioid use disorder (OUD) are particularly at-risk, and COVID-19 presented further challenges and disruptions in care. The continuous stress, changes to program and recovery support availability, and isolation during the pandemic resulted in increases in relapses and overdoses nationwide.

MARIETTA MUNICIPAL COURT PILOT

To provide safety net support and services during the pandemic, the Marietta Municipal Court, in partnership with the Addiction Policy Forum and Foundation for Opioid Response Efforts (FORE), expanded telehealth support to justice-involved substance use disorder (SUD) patients during the pandemic.

The Marietta Municipal Court telehealth pilot served 29 individuals with substance use disorder during the pandemic, providing an evidence-based smartphone app for recovery support; CBT4CBT, a digital therapeutics platform that delivers cognitive behavioral therapy; proactive engagement of highest-risk clients; and recovery support services from Addiction Policy Forum that included weekly forum, support groups, and peer/social worker sessions.

OUTCOMES

Marietta Municipal Court participants reported significant improvements in sleep; work, school, and volunteering participation; confidence in their recovery/abstinence; and, increased time around supportive people.

Improved Protective Factors

Improved Sleep	44.33%
Improved Participation in Work, School, Volunteering	0.60%
Increased Supportive People	14.68%
Increased Confidence in Recovery/Abstinence	2.62%

Reduced Risk Factors

Reductions in Risky Situation	50.00%
Reductions in Relationship Troubles	8.50%

In risk categories, participants reported improvements in engagement in risky situations and improvements in their relationships.

"This app is the best thing that's helped me throughout my road to recovery."

Connections App

To support individuals in recovery from substance use disorder, CHES Health created Connections, a smartphone app that is scientifically proven to support patients in recovery by reducing relapse and promoting pro-social engagement. The pilot provided the Connections App to 230 participants.

The digital therapeutics platform allows participants to:

- Track sobriety,
- Connect with trained counselors and peers through messaging,
- Track treatment plan and set reminders,
- Add medication and appointment reminders,
- Journal daily, and
- Access videos, testimonials and more through the resource library.

CBT4CBT

CBT4CBT teaches cognitive and behavioral skills that can help people gain control over their use of drugs or alcohol. Developed by a team of researchers and clinicians at Yale University led by Kathleen Carroll, CBT4CBT has been tested and validated in randomized clinical trials.

Skills taught to participants include:

- Recognizing and changing patterns of use
- Coping with craving and urges to use drugs or drink
- Challenging and changing negative thoughts
- Improving decision making skills
- Learning how to say NO effectively
- Improving problem-solving skills

A NATIONWIDE PILOT

Marietta Municipal Court was one of 21 criminal justice agencies selected for the pilot project across 16 states. The pilot provided services to a total of 634 justice-involved individuals with a substance use disorder, including 29 participants referred by the Marietta Municipal Court.

RECOVERY SUPPORT SERVICES

Addiction Policy Forum (APF) provided recovery services that included 1) peer support sessions; 2) online support groups; 3) weekly forums; and 4) case coordination with criminal justice agencies.

Peer Support Sessions

APF conducted 61 peer support one-on-one sessions led by social workers and peer navigators.

Online Support Groups

46 online support groups meetings were held, led by APF social workers and peer navigators.

Weekly Forums

Weekly forums of resources included support connecting to vaccines, gratitude modules, self care, and how to access support groups.

Case Coordination

Case coordination sessions with criminal justice agency staff helped with client matters ranging from housing needs to mental health services.

TESTIMONIALS

"There was no place to go because of COVID restrictions and lockdowns and after being on the app for a while I learned there was a recovery meeting on Thursday night, which was great. I met a lot of really cool, genuine and honest people and they helped me open up about my alcoholism...and I wasn't alone anymore."
